Assessment of Health: Exposures via drinking water are not expected because municipal water

serves the area. Direct contact exposures are not expected because the site surface was capped. NYSDOH and NYSDEC will evaluate the need

for additional investigations to determine the potential for soil

vapor intrusion into structures on or near the site.

Description: Prestolite is no longer in operation at this location. The property

was purchased by a new owner in late 1988. According to the Right-to-Know questionnaire response prepared by Prestolite, some hazardous wastes were dumped on the property in the past. Drums were observed in past inspections, but have since been removed. A PRP

Phase II Investigation was completed in 1988. A Phase II report addendum was also submitted. Soil & Dil & Di
